Odyssey Town: Barclay House

A project that parents and children can make together

MATERIALS:

- Barclay house template
- scissors
- adhesive (such as a strong glue stick or rubber cement)
- colored pencils, crayons or markers

TERMS:

inside/inward: refers to the direction of what is inside the building

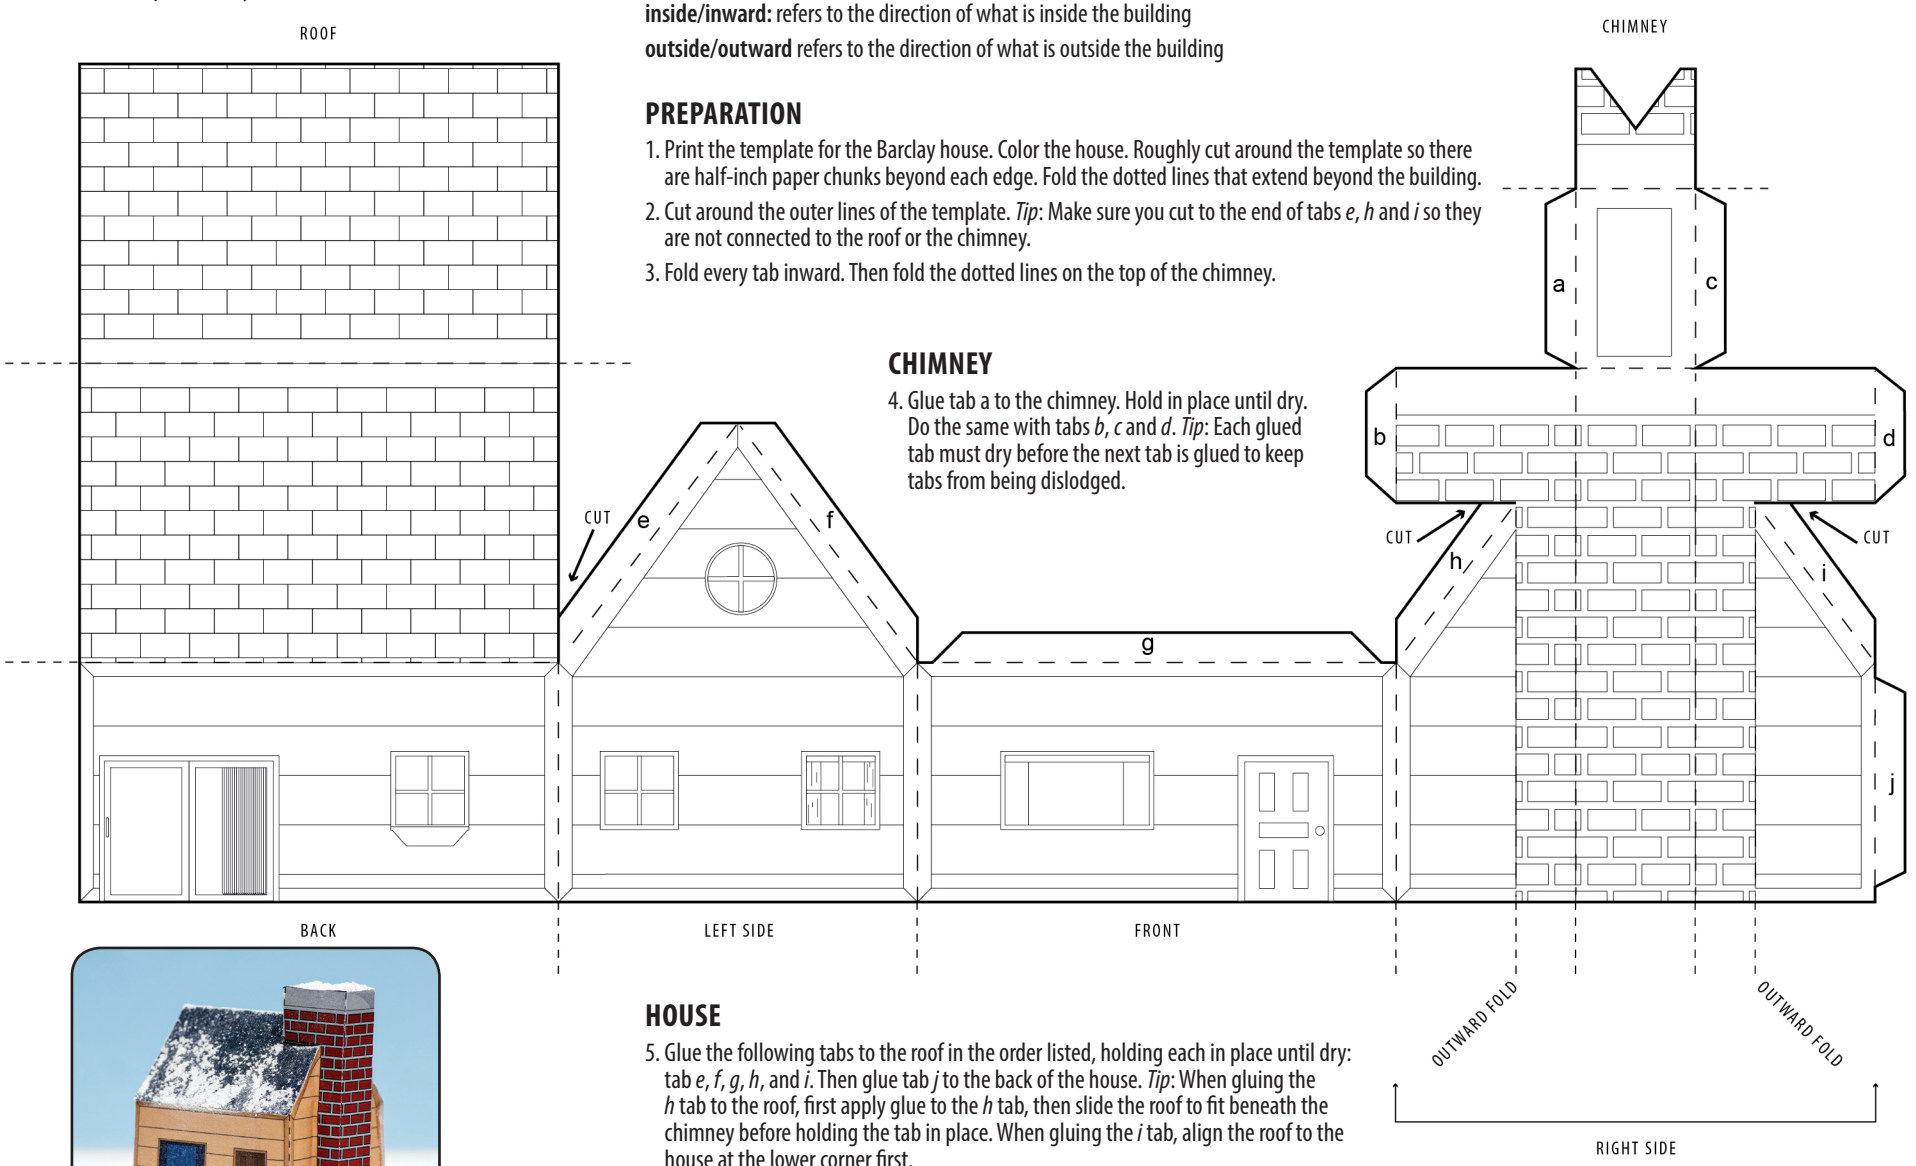

outside/outward refers to the direction of what is outside the building

PREPARATION

1. Print the template for the Barclay house. Color the house. Roughly cut around the template so there are half-inch paper chunks beyond each edge. Fold the dotted lines that extend beyond the building.
2. Cut around the outer lines of the template. *Tip*: Make sure you cut to the end of tabs *e*, *h* and *i* so they are not connected to the roof or the chimney.
3. Fold every tab inward. Then fold the dotted lines on the top of the chimney.

CHIMNEY

4. Glue tab a to the chimney. Hold in place until dry. Do the same with tabs *b*, *c* and *d*. *Tip*: Each glued tab must dry before the next tab is glued to keep tabs from being dislodged.

HOUSE

5. Glue the following tabs to the roof in the order listed, holding each in place until dry: tab *e*, *f*, *g*, *h*, and *i*. Then glue tab *j* to the back of the house. *Tip*: When gluing the *h* tab to the roof, first apply glue to the *h* tab, then slide the roof to fit beneath the chimney before holding the tab in place. When gluing the *i* tab, align the roof to the house at the lower corner first.

Set Barclay house in your Odyssey town.
